Demo

OPERATIONAL PLATFORM

CLOUDOGU ECOSYSTEM

open source

Marketplace

Select and manage tool stacks

- Software dev
- Project management
- Digital workplace
- Custom tool stacks

Deployment

Deploy tool stacks automatically in different envs:

- Public Cloud
- On-Premises
- Air-Gapped

Operations

Centralized, automated multi-cloud operations of tool stacks

Cloud Switching

Migrate tool stacks to other environments

In Pratice

Informations Technik Zentrum Bund

Software Entwicklungsplattform Cloud

500 Instances

7.700 Users

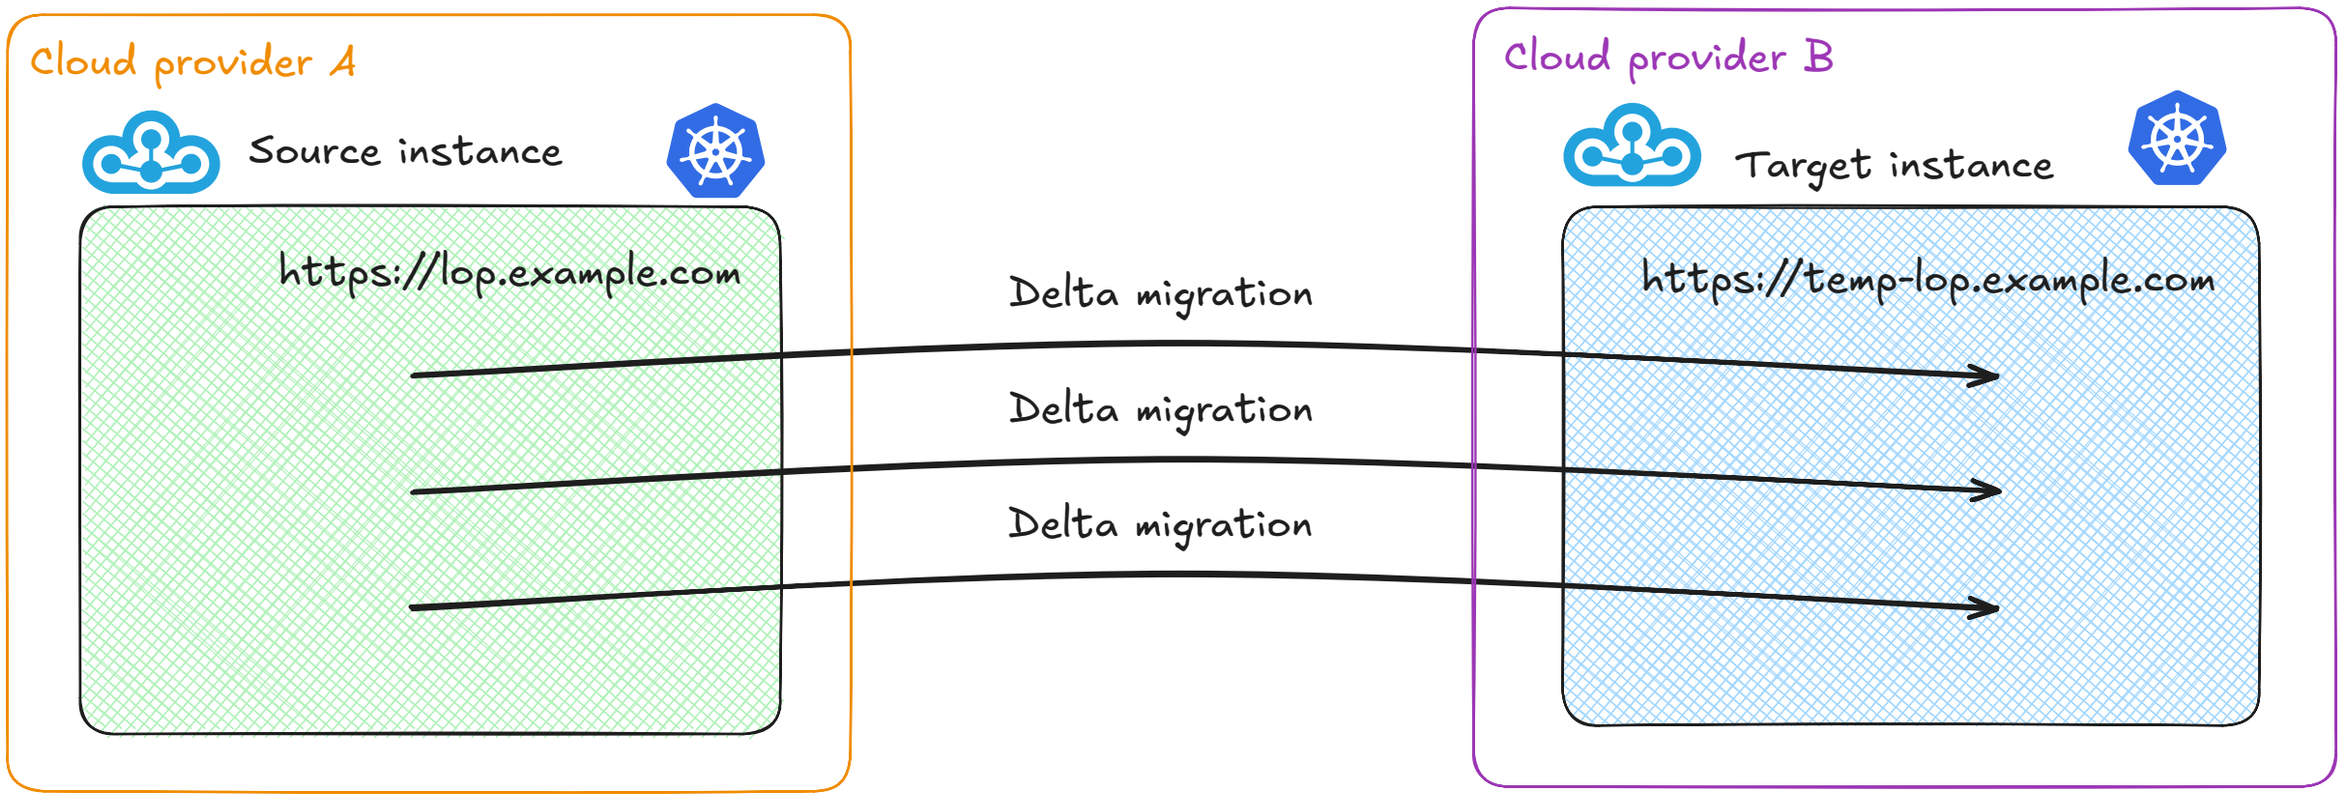

EcoSystem

Base platform since 2018

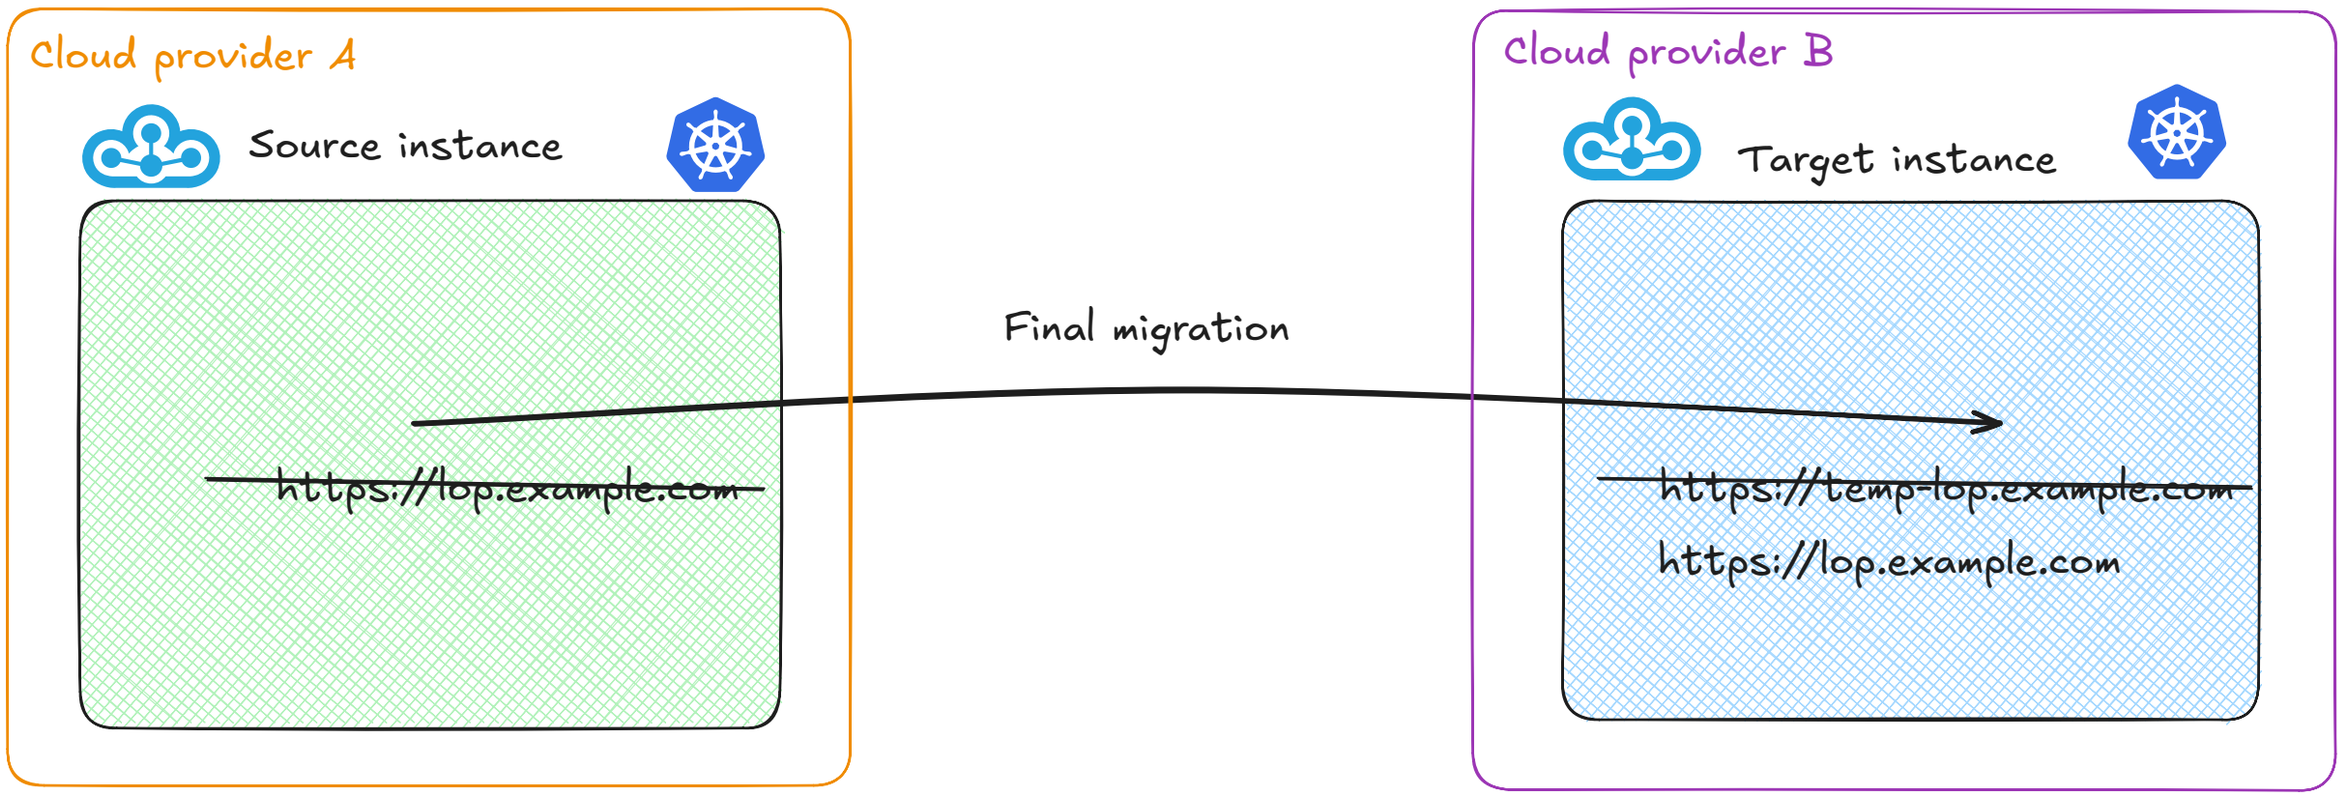

Tech Details

Delta migration

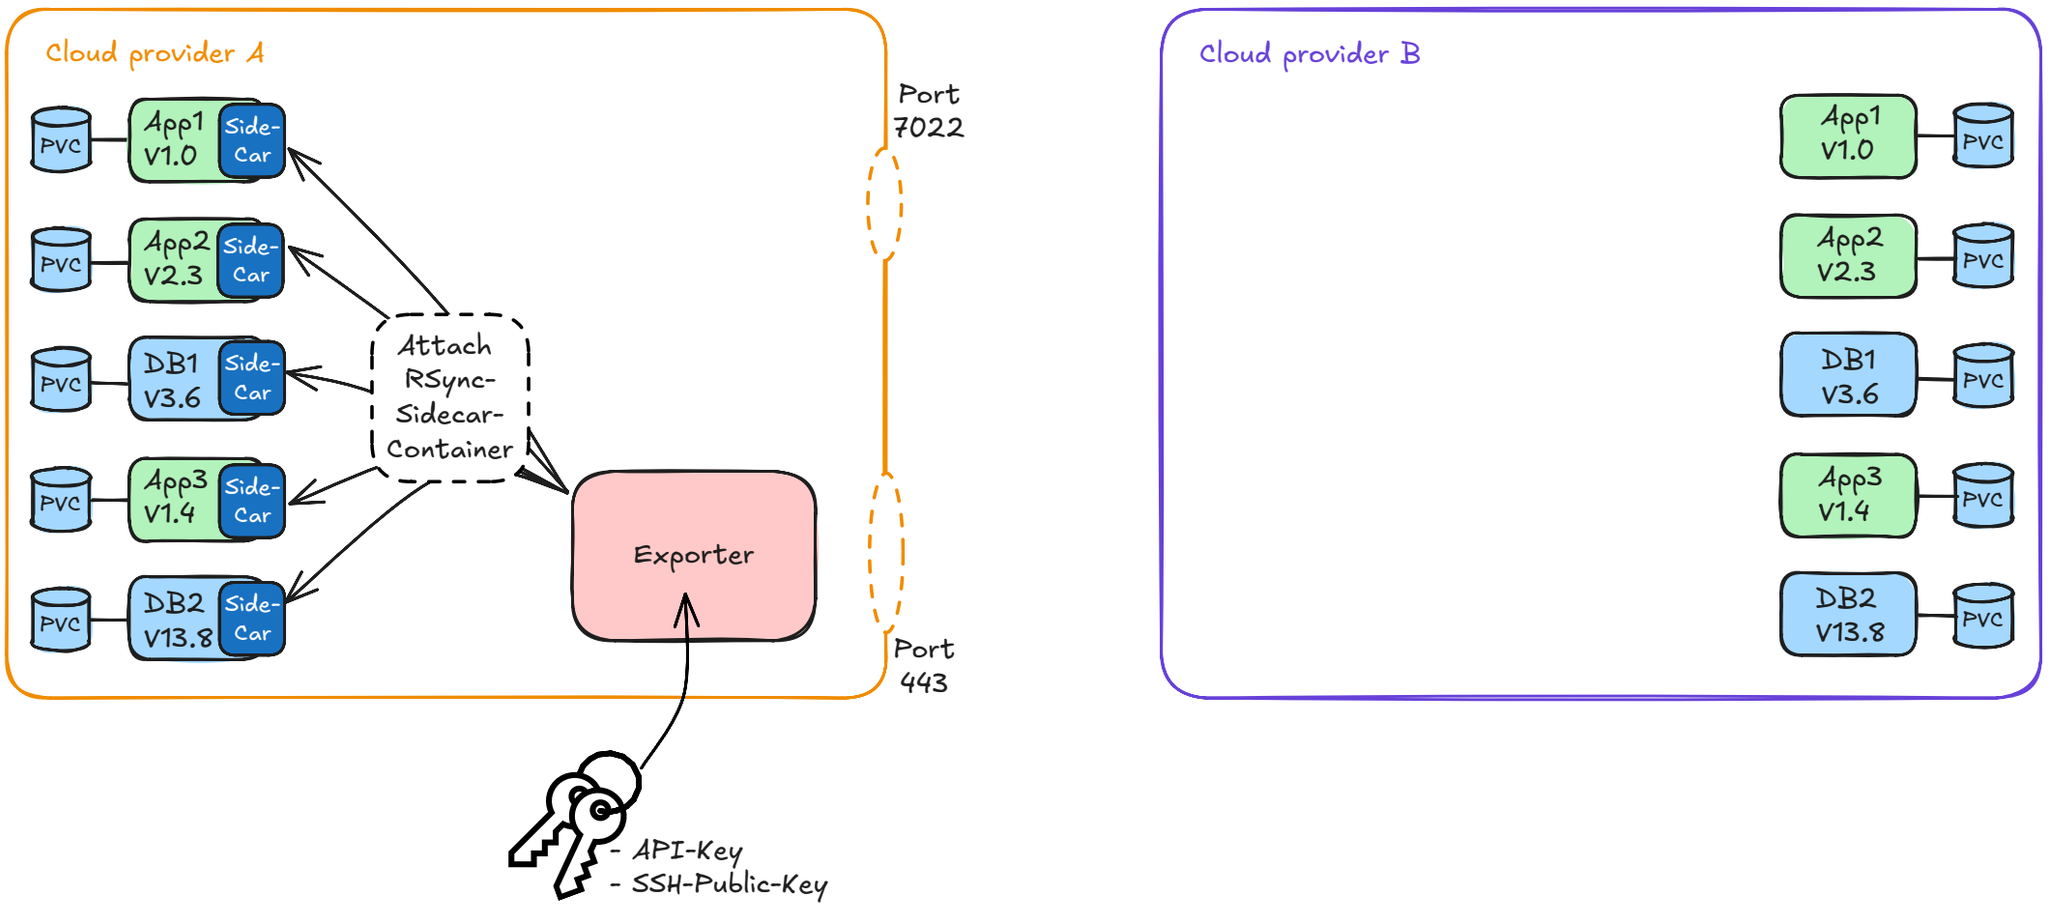

Final migration

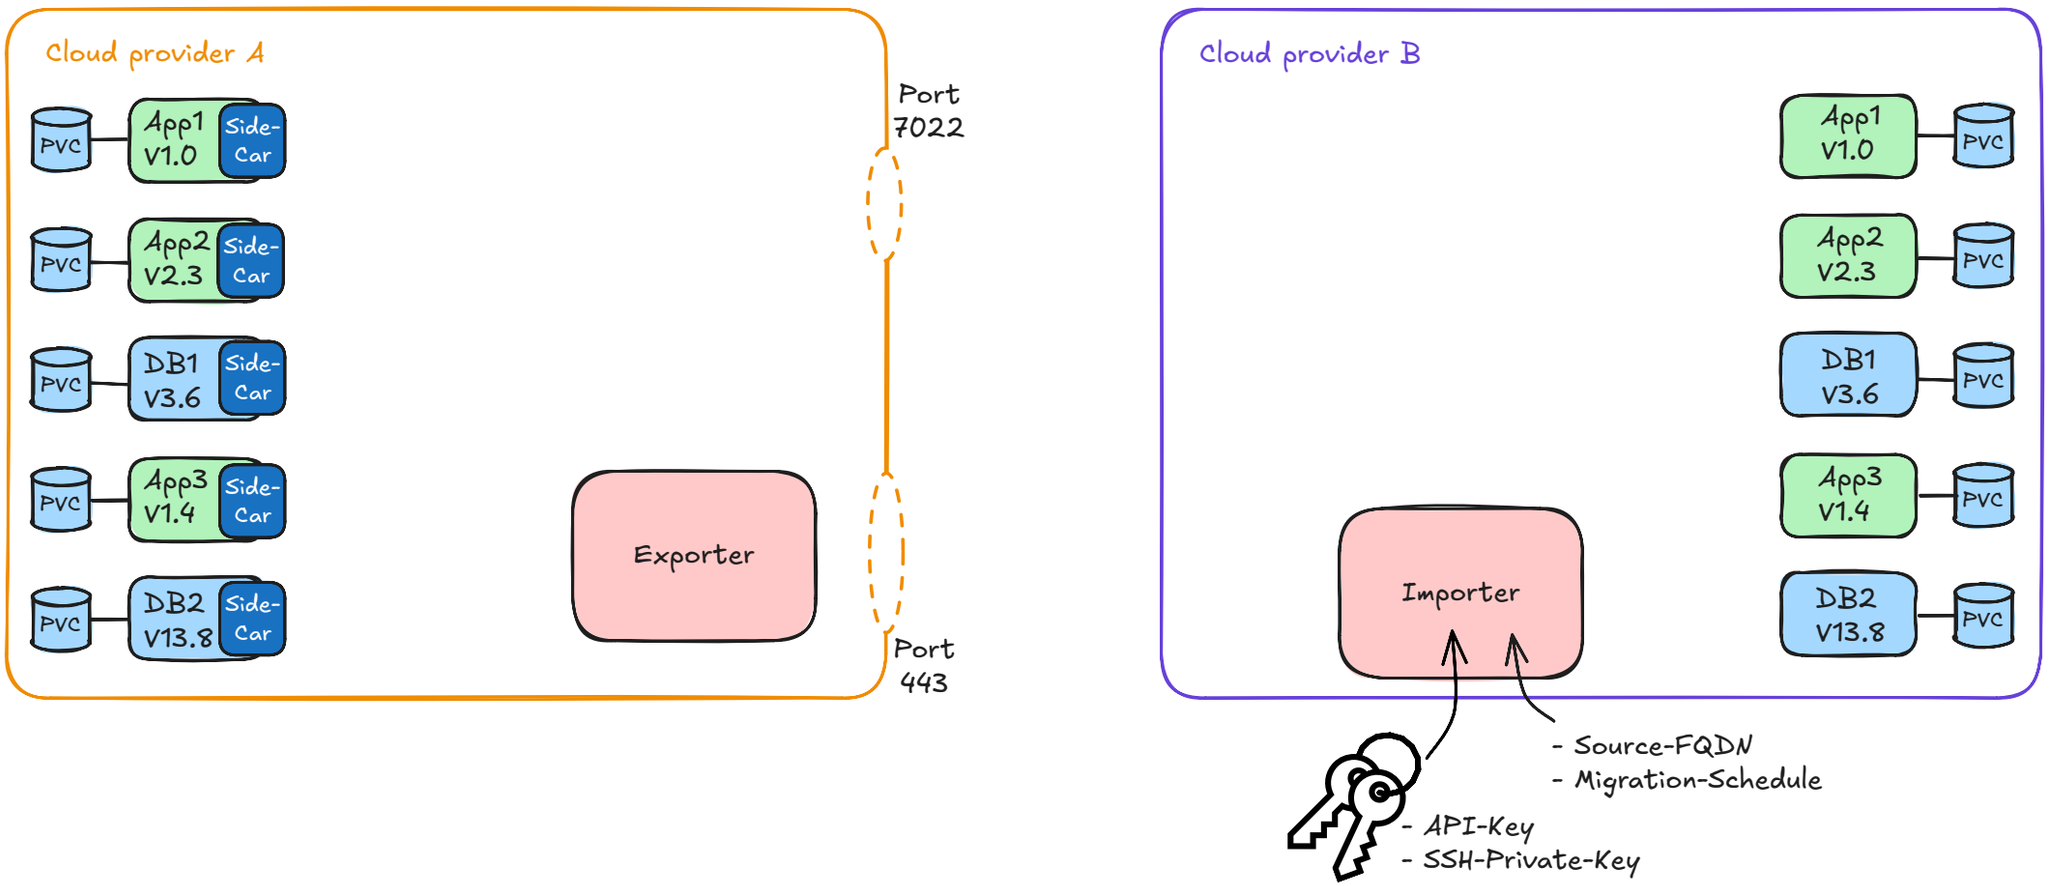

Preparing the migration

Prepare source instance

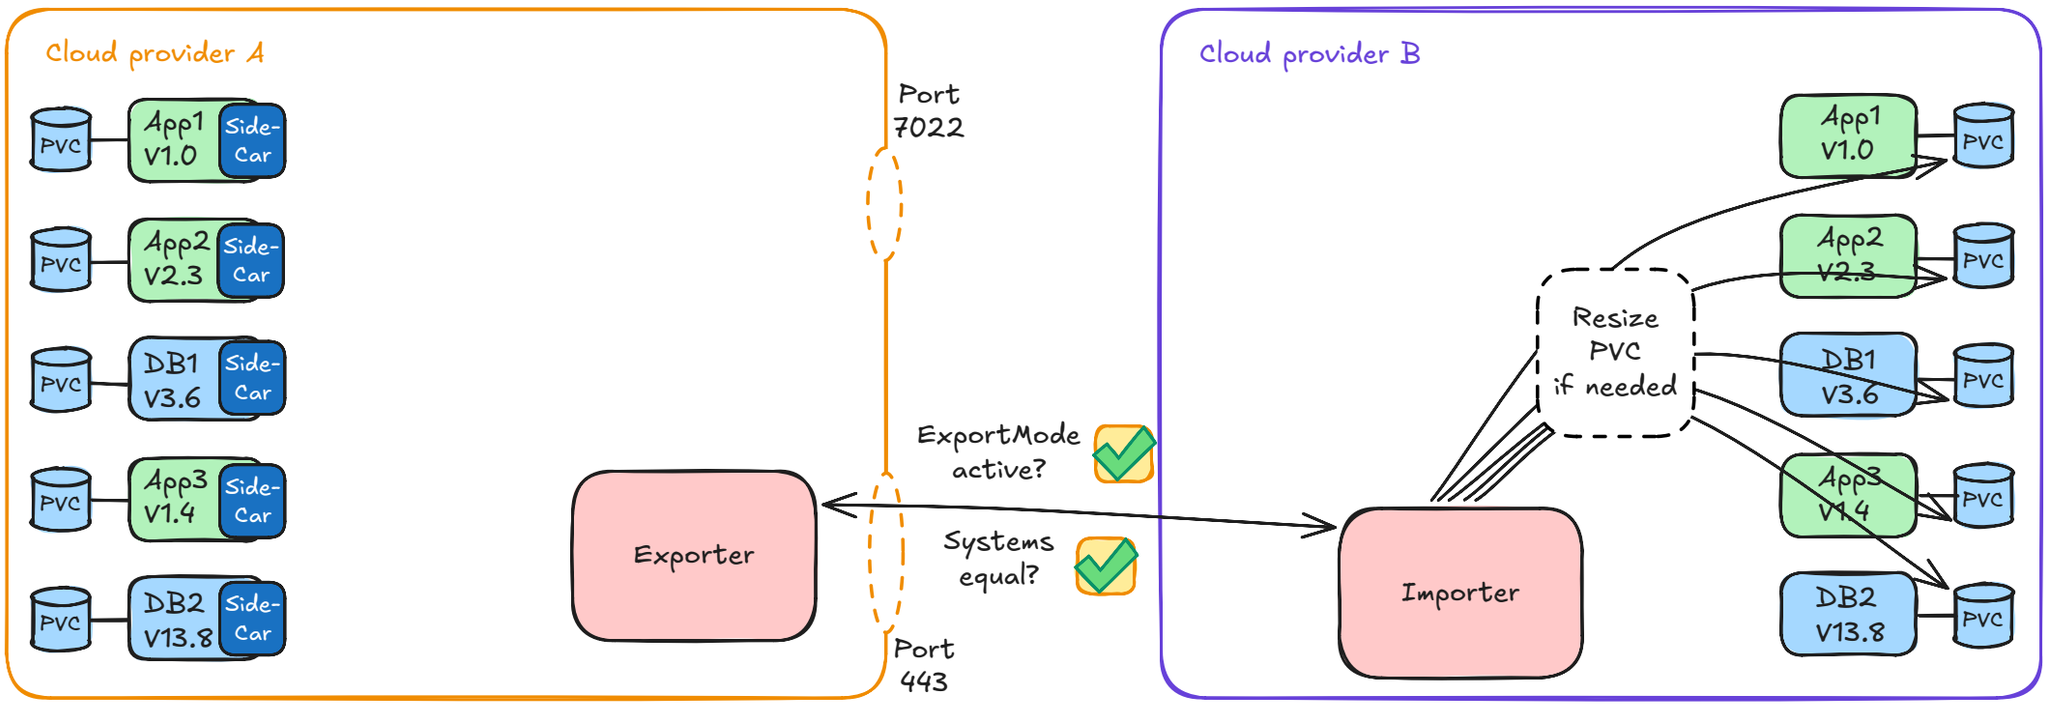

Prepare target instance

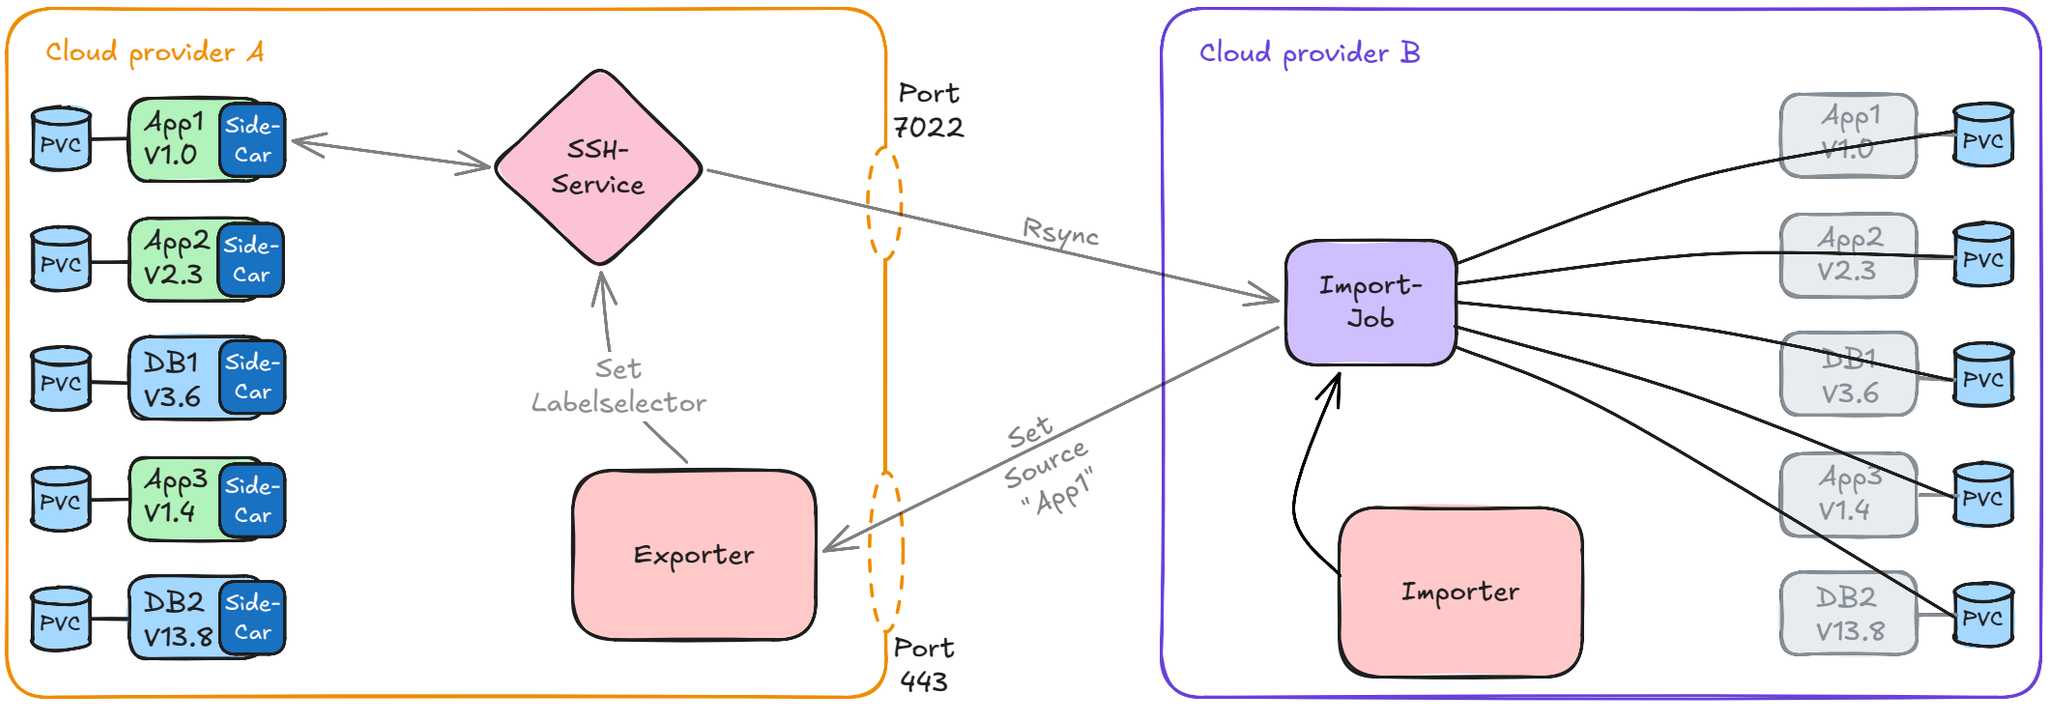

Executing the migration

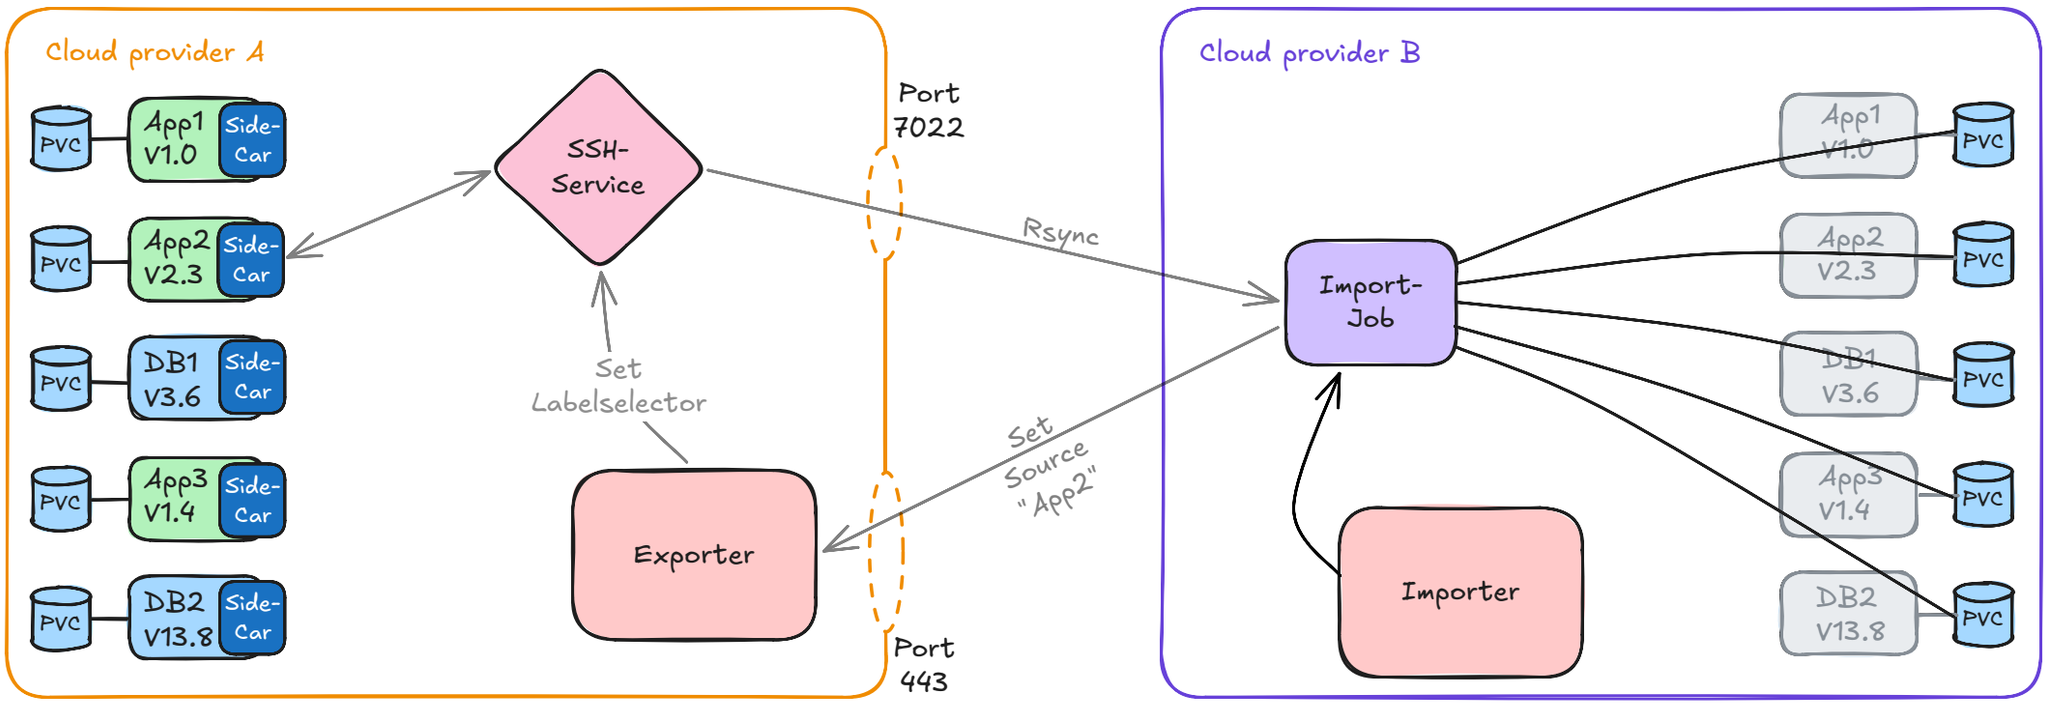

Verify preconditions

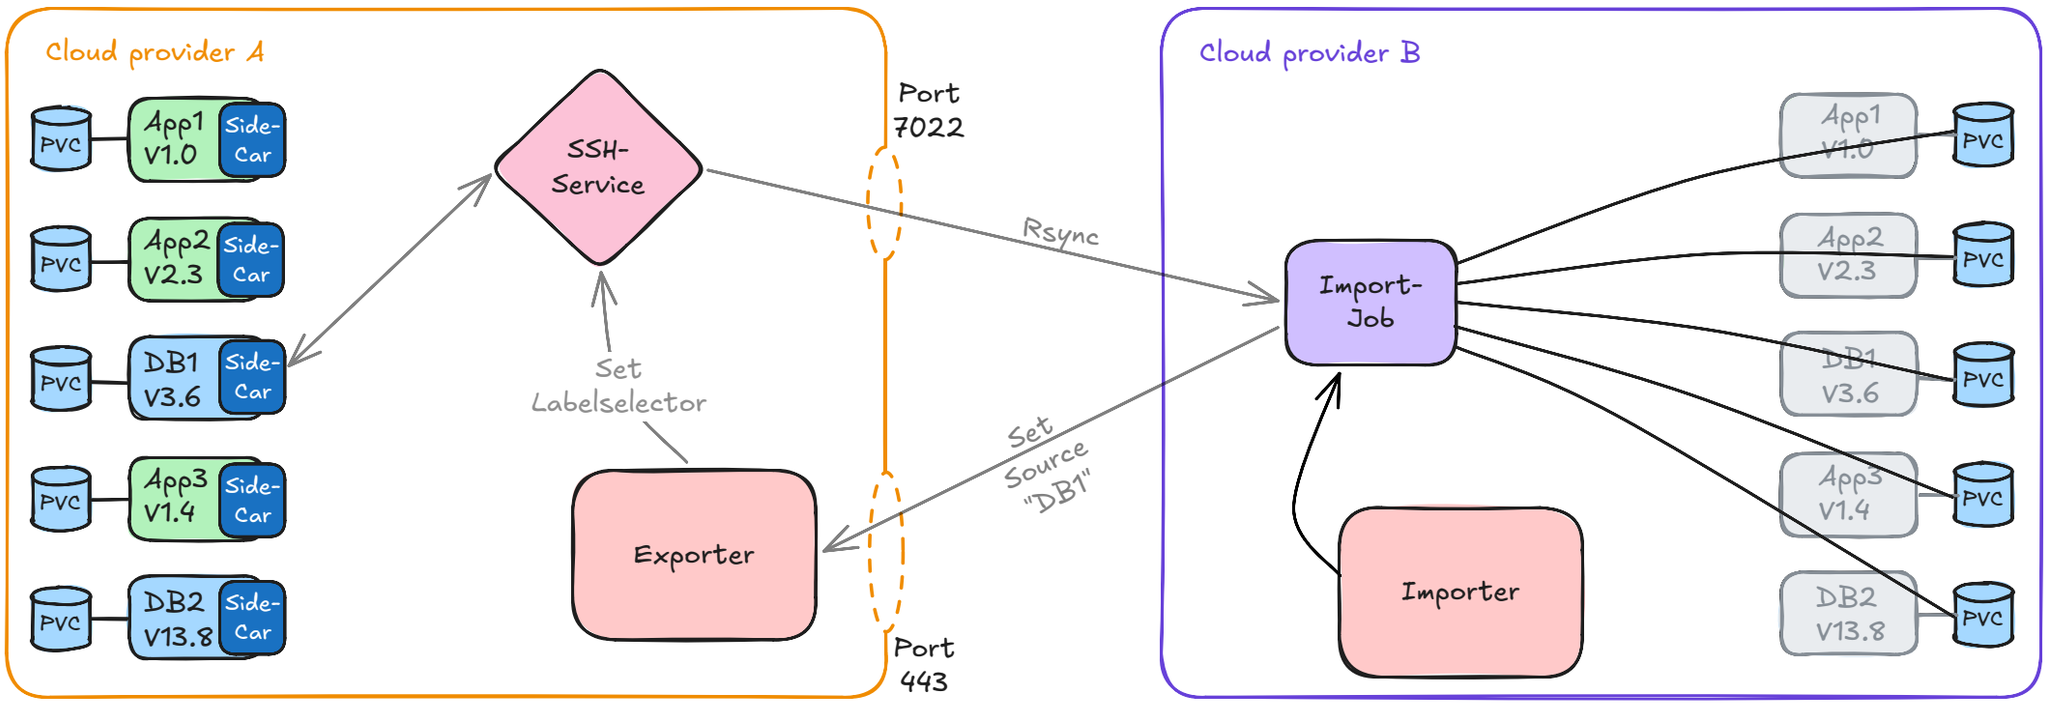

Migrate volume data

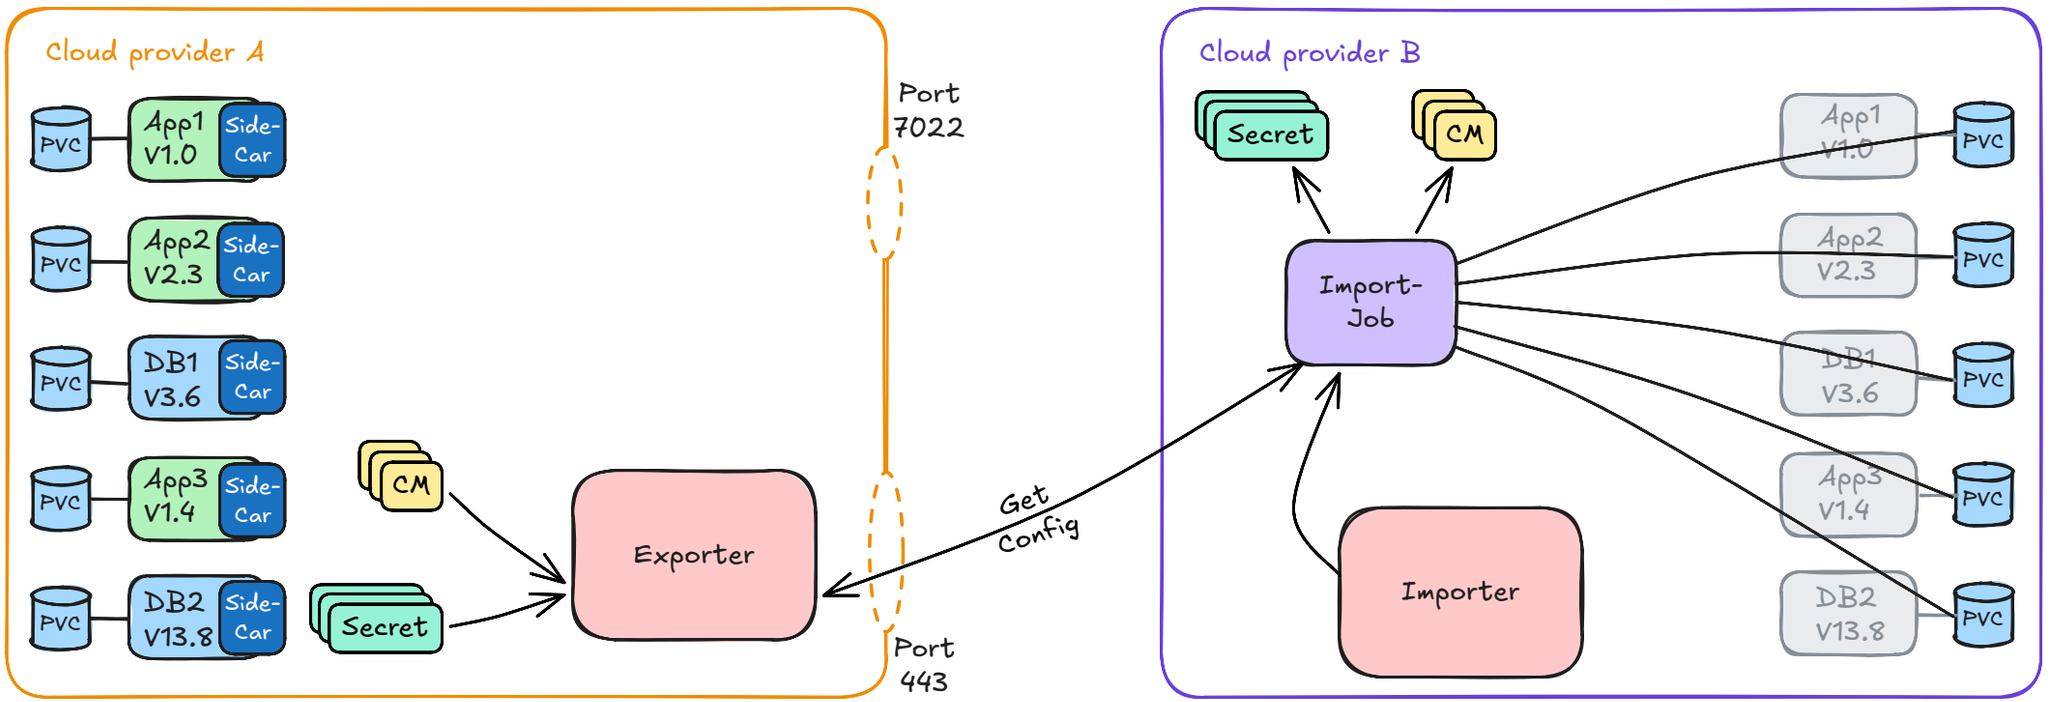

Migrate volume data

Migrate volume data

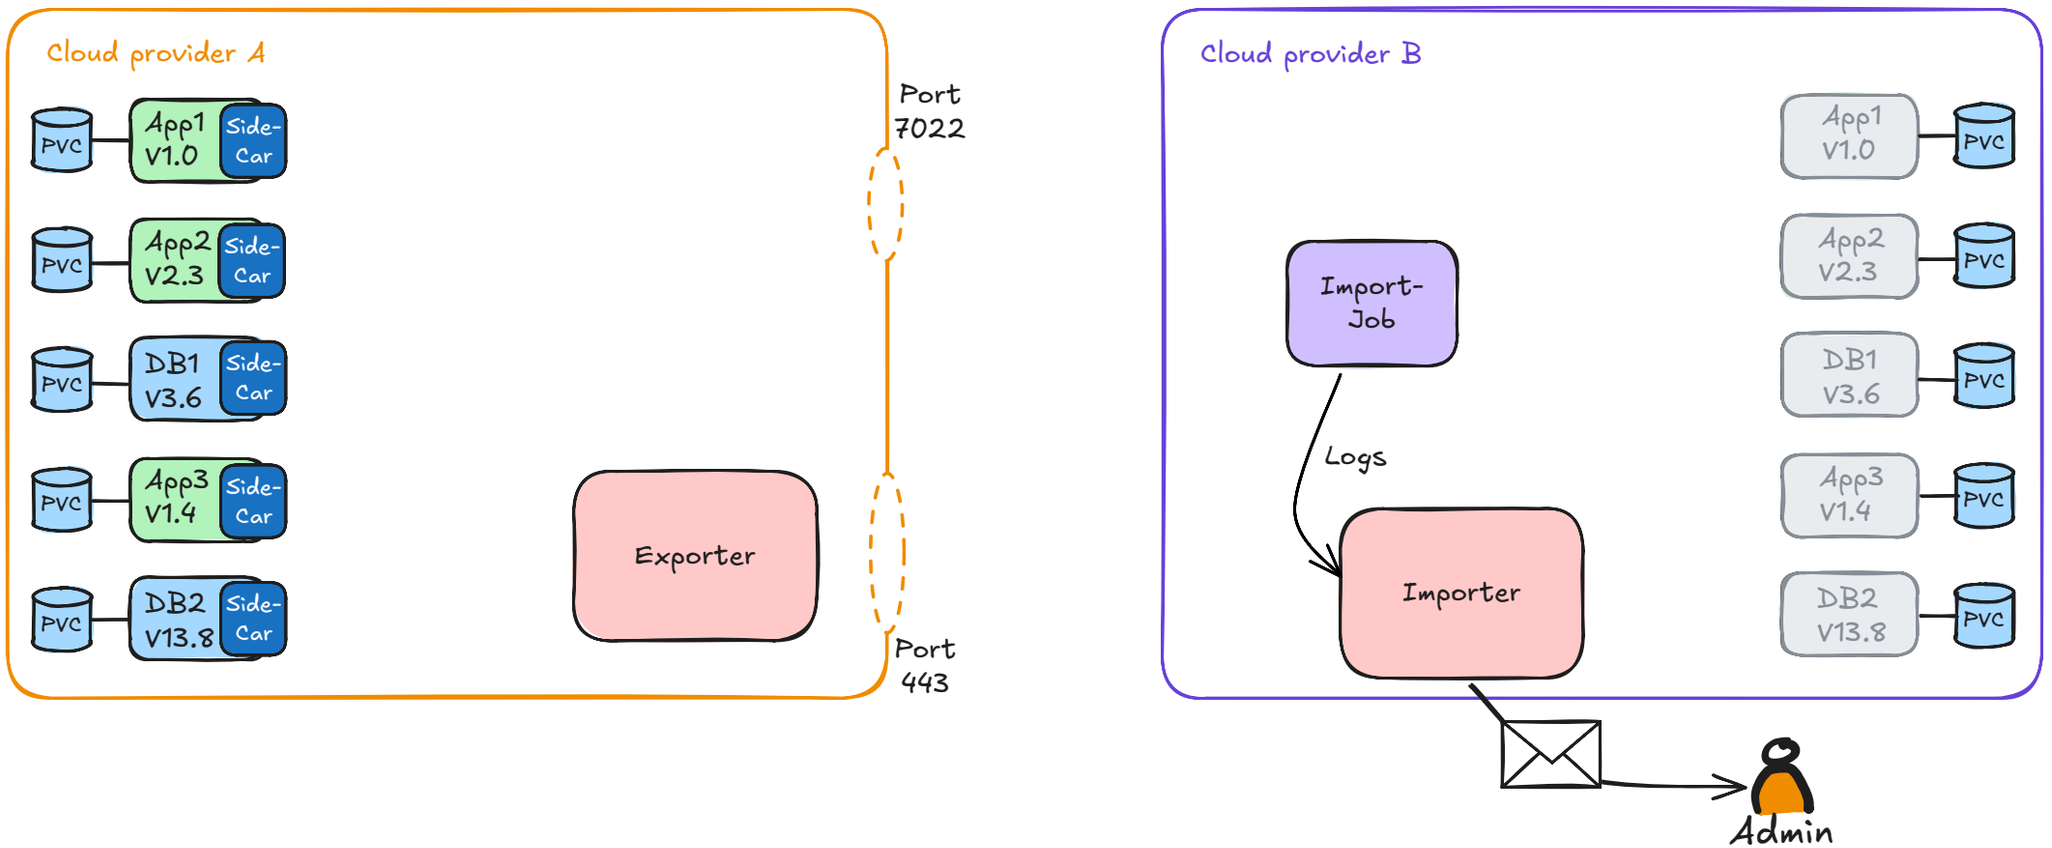

Migrate configuration data

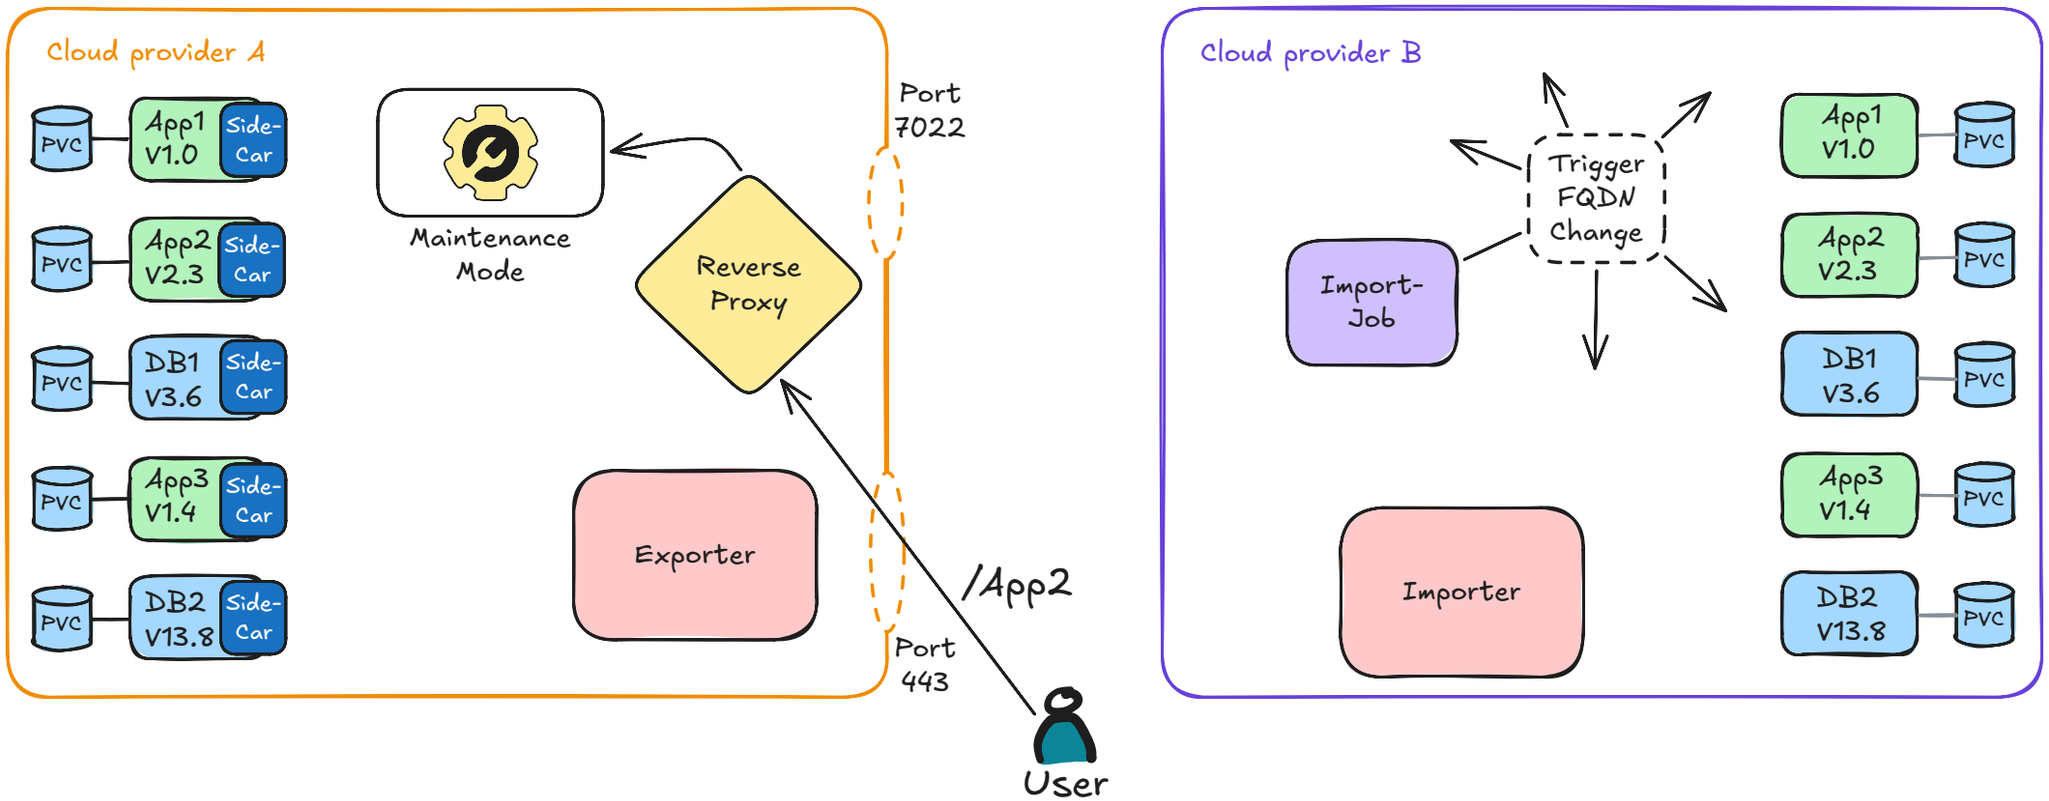

Finishing the migration

Finish migration

Additional steps on final migration

What we learned

- ✅ PoCs helped de-risk key decisions
- ✅ Separation (exporter / importer) kept it flexible
- ❌ Manual testing became a bottleneck

Conclusion

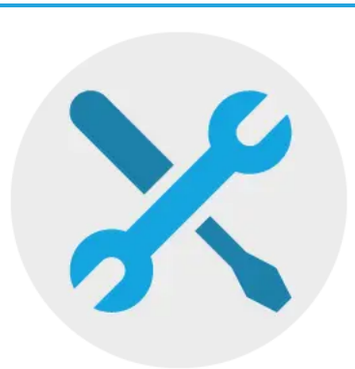

Migration without the usual pain

- 🔄 Repeatable migrations → safe to test
- ⚡ Delta-based transfer with rsync
- 🔒 Minimal network requirements (HTTPS + SSH)
- ✅ Open Source
